Volume 159 October 1985

## CONTENTS

Evolution of a single wake behind a pair of bluff bodies. C. H. K. Williamson *page* 1

Internal solitons on the pycnocline: generation, propagation, and shoaling and breaking over a slope. Timothy W. Kao, Fuh-Shing Pan and Dominique Renouard 19

One-dimensional linear analysis of the compound jet. Angel Sanz and José Meseguer 55

Resonant and non-resonant waves excited by periodic vortices in airflow over water. J. P. Giovanangeli and A. Memponteil 69

An experimental study of organized motions in the turbulent plane mixing layer. A. K. M. F. Hussain and K. B. M. Q. Zaman 85

Measurements in the turbulent boundary layer on an 'infinite' swept wing. P. Bradshaw and N. S. Pontikos 105

On the evidence for the effect of bubble interference on cavitation noise. Vijay H. Arakeri and V. Shanmuganathan 131

Absolute and convective instabilities in free shear layers. P. Huerre and P. A. Monkewitz 151

The superharmonic instability of finite-amplitude water waves. P. G. Saffman 169

Compressible-flow channel flutter. J. B. Grotberg and T. R. Shee 175

Stokes flow in arbitrary two-dimensional domains: shear flow over ridges and cavities. Jonathan J. L. Higdon 195

Critical levels in a jet-type flow. Hector Teitelbaum and Hennie Kelder 227

Non-parallel-flow stability of a two-dimensional buoyant plume. Shunichi Wakitani 241

The stability of flows in channels with small wall curvature. G. A. Georgiou and P. M. Eagles 259

The decay of transients in a contained stratified fluid. L. M. Hocking 289

Optimal discharge profiles for sudden contaminant releases in steady, uniform open-channel flow. N. C. Daish 303

Evaporation from a plane liquid surface into a turbulent boundary layer. P. W. M. Brighton 323

Stability analysis adjacent to neutral solutions of the Taylor–Goldstein equation when Howard's formula breaks down. L. Engevik, P. M. Haugan and S. Klemp 347

Magnetostatic equilibria and analogous Euler flows of arbitrarily complex topology. Part 1. Fundamentals. H. K. MOFFATT 359

Evolution of scalar spectra with the decay of turbulence in a stratified fluid. A. E. GARGETT 379

Turbulent stirring in an experimental induction furnace. E. TABERLET and Y. FAUTRELLE 409

A study of nonlinear wave resistance using integral equations in Fourier space. T. MILOH and G. DAGAN 433

The effects of a strongly temperature-dependent viscosity on Stokes's drag law: experiments and theory. A. ANSARI and S. MORRIS 459

The effect of very low axial clearances on the performance of an axial-flow compressor stage. S. B. FURBER 477

On the fluid dynamics of the aortic valve. F. K. WIPPERMANN 487

Two-layer model of shear-driven coastal upwelling in the presence of bottom topography. SIAVASH NARIMOUSA and TONY MAXWORTHY 503

REVIEW

*A First Course in Fluid Dynamics, by A. R. Paterson*; *Inviscid Fluid Flows, by H. Ockendon and A. B. Tayler* 533
